## **MARK YOUR CALENDARS**

**WINTER CONFERENCE  
LINCOLN, NEBRASKA  
FEBRUARY 9 & 10, 2012**

### **Thursday: Plan Review and Inspection of Firestop Systems**

**Length of Seminar:** 1 Day

**ICC CEU Credit:** 0.6

**Experience Level:** Intermediate

**Description:**

Firestop provisions of the 2012 International Building Code (IBC) for plans examiners, inspectors, fire officials, architects and engineers. Focus will be on understanding the requirements of sections 714 and 715 of the IBC. Will cover joint systems, perimeter containment and through and membrane-penetrations in fire-resistive assemblies along with firestopping significant changes of the 2012 IBC. Provide helpful hints for plans examiners and inspectors for firestop systems.

**Instructor: Brice Miller**

Brice has over 25 years' experience as Building Official, Inspector and Plans Examiner and holds four International Code Council (ICC) certifications. He now speaks to code officials throughout the country on firestopping and was appointed a few years ago to the (ICC) - IBC General Code Development Committee. Brice is Past President of the Colorado Chapter of International Code Council plus he has served on ICBO and ICC education and certification committees including the ICC Board of International Professional Standards. Since 1989 Brice has been the coordinator for the ICC Northern Colorado Code Professional Association. He is also a part time code instructor for a local community college in Fort Collins, Colorado. Brice is now the Executive Director of the International Firestop Council.

### **Friday: Vendor Day-** McKeon Door & Louisiana Pacific

**Length of Seminar:** 1 Day

**ICC CEU Credit:** 0.7

**Experience Level:** Intermediate

**Description:**

The class is formatted to present the building code as it pertains to the use of opening protective.

- 1) recite performance-based requirements in layman's terms for common-sense understanding,
- 2) include specific technical code language as required,
- 3) illustrate product case studies presented as design solutions to frequently approached complex code application challenges.
